

Mission Statement

“Smart Sole Cleaner”

Dirt Removal from Outer Sole of Footwear in Place of Doormats

Problem Statement:

Traditional doormats are often ineffective in thoroughly removing dirt from footwear soles, leading to unclean interiors and frequent maintenance. Due to which hygiene and dust control inside the area of interest is not able to be maintained.

Brief Description:

Introducing an automated solution for removing dirt from the outer soles of footwear which will revolutionize cleanliness and hygiene by providing an efficient approach. Designed as a superior alternative to traditional doormats, our system ensures a cleaner and more hygienic environment for households, commercial spaces(malls & restaurants).

Parts:

1. Brush,
2. Pressurized air system,
3. Heating element, and
4. Water sprinkler device.

Price Range in Rupees: ₹600 – ₹900

Benefit Proposition:

1. **Enhanced Hygiene & Cleanliness** – Effectively removes dirt, dust, and debris from footwear soles, preventing contamination in clean environments
2. **Automated & Efficient Cleaning** – Uses high-pressure air, brushes, and optional water droplets to provide thorough cleaning without manual effort.

3. **Reduces Maintenance Costs** – Minimizes the need for frequent floor cleaning and upkeep, extending the life of indoor flooring and carpets.

Key Business Goals:

1. **Market Acceptance:** Facilitate widespread adoption in consumer market
2. **Scalability & Expansion:** Develop modular designs to cater to different market segments, from households to industrial cleanrooms, enabling broader reach and business growth.
3. **Innovative Market Entry:** Establish our dirt removal system as a unique and effective alternative to traditional doormats.
4. **Technological Advancements:** Integrate smart features like automated cleaning or dirt detection for future product iterations.

Primary Market:

- Households
- Hostel Rooms
- Malls and Restaurants entrance

Secondary Market:

- Cleanrooms (Semiconductor, Pharmaceutical, Biotech)
- Public Transport Hubs
- Gyms and Fitness Centers
- Hospitals and Clinics

Assumptions and Constraints:

- The product will be lightweight, durable, and easy to maneuver.
- The product will efficiently remove dirt from footwear soles with minimal effort.
- Achieving cost-effective production while maintaining quality.
- The product should fit seamlessly into different environments without being intrusive.

Indirect Competitors:

- Welspun
- Nilkamal

Stakeholders:

- End Consumers – Households, offices, hospitals, hotels, and industries using the product for cleanliness.
- Retailers & Distributors – Selling the product through online and offline markets.
- Manufacturers & Suppliers – Producing and supplying raw materials and components.
- Regulatory Bodies & Government Agencies – Ensuring compliance with quality and safety standards.
- Technology Developers – Enhancing product functionality with automation or smart features.
